

Laundry Add-On SOP

The Cleaning CEO Blueprint — 100% Cleaner Academy

Service type: Wash / dry / fold add-on

Price reference: +\$50 per load (one load = one standard washer capacity)

Time target: 60–90 min total (includes machine cycle wait time — work other rooms while machines run)

Purpose

When a client purchases the laundry add-on, your team washes, dries, and folds **one load** of linens or clothing per the client's instructions. This SOP ensures fabric care, prevents dye disasters, and delivers hotel-quality folds.

Confirm on work order before starting: One load or multiple? Linens only or clothing? Special detergent (hypoallergenic, scent-free)?

Pre-Job Confirmation

Ask or verify in booking notes:

- ☐ **One load (+\$50)** or additional loads (+\$50 each)?
- ☐ Linens and towels only, or clothing included?
- ☐ Washer/dryer location accessible?
- ☐ Client detergent or use yours (bring hypoallergenic backup)?
- ☐ Hang vs fold preferences for specific items?
- ☐ Any "do not wash" items in the hamper (dry-clean only)?

Do NOT wash items without checking labels if mixed load.

Supplies

- ☐ Hypoallergenic detergent (unscented backup)
- ☐ Dryer sheets or wool dryer balls (if client approves)
- ☐ Laundry bag for transport (STR turnovers)

- ☐ Stain pretreatment stick (spot use only)
 - ☐ Hangers (only if client provides and requests)
 - ☐ Gloves (optional — for dirty STR linens)
-

Wash / Dry / Fold Protocol

Step 1 — Sort & Inspect (5 min)

- ☐ Separate whites, darks, and colors if mixed — **when in doubt, separate**
- ☐ Check pockets (tissue, phones, money — return to client)
- ☐ Read care labels on clothing items
- ☐ Remove dry-clean-only items — leave on counter with note
- ☐ Pretreat visible stains only — blot, don't guarantee removal
- ☐ Shake out excess debris (pet hair, sand) before loading

Do NOT wash: Wool, silk, dry-clean only, items labeled hand wash (unless client explicitly approves and accepts risk).

Step 2 — Wash (30–40 min machine time)

- ☐ Load washer — **do not overfill** (3/4 full max for proper agitation)
 - ☐ Select appropriate cycle:
 - ☐ **Linens/towels:** Warm or hot (if fabric allows), normal cycle
 - ☐ **Clothing:** Cold or warm per label, normal or delicate
 - ☐ **Delicates:** Delicate cycle, cold, mesh bag if available
 - ☐ Use correct detergent amount — too much leaves residue
 - ☐ Start washer; **note finish time** on phone
 - ☐ Proceed to clean other rooms while waiting — do not stand idle
-

Step 3 — Dry (30–50 min machine time)

- ☐ Transfer promptly when wash completes — mildew starts in 30 min sitting wet
- ☐ Clean dryer lint trap **before every load** — fire safety requirement
- ☐ Select heat setting:
 - ☐ **Towels/linens:** Medium or high (if cotton)

- ☐ **Clothing:** Low or per label
 - ☐ **Delicates:** Low heat or air dry
 - ☐ Do not over-dry — removes softness from fabrics
 - ☐ Continue other cleaning tasks while drying
-

Step 4 — Fold & Stage (15–20 min)

Fold to **100% Cleaner standard:**

Towels:

- ☐ Bath towels: fold in thirds lengthwise, then in half — smooth edge out
- ☐ Hand towels and washcloths: fold in thirds, stack matching sizes

Bed linens:

- ☐ Fitted sheet: tuck corners into each other, fold flat stack
- ☐ Flat sheet and pillowcases: fold crisp rectangle, stack as a set
- ☐ Place on clean bed or designated shelf — never floor

Clothing:

- ☐ Fold shirts, pants, and casual wear neatly
 - ☐ Hang dress shirts, blouses, and items client specifies on **client hangers only**
 - ☐ Match socks in pairs; fold underwear in drawer-ready stacks
 - ☐ Place on bed or counter — **never mix with dirty items**
-

STR / Airbnb Laundry Workflow

For turnovers with in-unit laundry:

- ☐ Strip beds first → start wash immediately on arrival
 - ☐ Use host-provided detergent and settings from host guide
 - ☐ Time laundry to finish before bed-making phase (~90 min into turnover)
 - ☐ If laundry won't finish in 2–3 hr window: notify host, use backup linen set if available
 - ☐ Never leave wet laundry in washer when locking up
-

Multi-Load Jobs

Loads	Price	Time Impact
1 load	+\$50	Work other rooms during cycles
2 loads	+\$100	May need extended time — confirm schedule
3+ loads	Custom quote	Often requires 2nd cleaner or return trip

Run loads **sequentially** unless client has two machines. Do not leave washer unattended off-site.

Quality Standards

Laundry add-on passes when:

- ☐ Items are clean, dry, and smell fresh (not mildewy or overly perfumed)
 - ☐ Folds are neat and uniform
 - ☐ No dye transfer between items
 - ☐ Items placed where client requested (bed, basket, closet)
 - ☐ Lint trap cleaned before leaving
 - ☐ Washer door left open to air (front-load — prevents mold)
-

Do NOT (Laundry)

- **✗** Mix reds with whites — ever
 - **✗** Wash client dry-clean items to save time
 - **✗** Use bleach without explicit client approval
 - **✗** Leave wet laundry in washer when job ends
 - **✗** Take client laundry off-site to your home machines
 - **✗** Use heavily scented detergent unless client requests
 - **✗** Overload washer to finish faster — items won't get clean
 - **✗** Ignore "delicate" labels on expensive clothing
-

Damage Protocol

If something goes wrong:

1. Stop immediately
 2. Photo the item and machine settings
 3. Notify client and office same day
 4. Do not discard damaged items
 5. Document in job notes — shrinkage, dye bleed, or machine error
-

Upsell Script

"I can add a laundry load while we clean — wash, dry, and fold for \$50. Most clients do linens on regular day and save the weekend. Want me to grab the hamper?"

100% Cleaner — Fold it right. Stack it tight. Client delight.
